# BORELOCK FAST-ATTACH SYSTEM

The BoreLock fast-attach mounting system is our newest generation of fast-attach mounts. The BoreLock mount provides an easy to operate and secure attachment to many of the common weapon models available. BoreLock mounting suppressors are available from 5.56 mm NATO up to .338 LM caliber.

Suppressors equipped with the BoreLock mount are designated by the letters "BL".

- 2 BoreLock fast-attach system
- 4 DUAL556-BL & DUAL762-BL
- 5 DUAL556-BL MG & DUAL762-BL MG
- 6 S Series SL7i-BL
- 7 S Series SL8i-BL .300 blk
- 8 S Series SL4i-SMG MP5 & SL6i-SMG MP5
- 9 Thread mounting suppressors
- 10 Typical sound pressure levels
- 11 Why choose an Ase Utra suppressor?

**A 4-position adjustable mount allows for a secure fit.**

## **BORELOCK HIPER AND BIRD CAGE FLASH HIDERS**

The Hiper flash hider is an extremely efficient flash hider. The tapered alignment surface before the attachment thread effectively blocks fouling from entering the mounting surfaces and allows for ease of attachment and removal. HiPer flash hiders are available to a variety of weapon types, from .223 Rem up to .30 caliber.

For those seeking a more traditional flash hider solution, we also have a BoreLock bird cage flash hider available in the same calibers.

## **BORELOCK .30/.338 AND .223/5.56 CAL MUZZLE BRAKES**

The two-part design of the BoreLock muzzle brakes provides for secure, simple, and quick installation. No washers or shims required, thus allowing for precise alignment.

## **BORELOCK MOUNTING COLLAR**

The primary purpose of the BoreLock mounting collar is to enable the user to continue using a flash hider or a muzzle brake that is already on the weapon.

To be compatible with the BoreLock mounting collar and suppressors, the muzzle device needs to be under 22 mm in diameter and have a maximum length of 63 mm.

Muzzle flash with an A1 bird cage flash hider, M4 carbine with 14.5" barrel.

Muzzle flash with an Ase Utra HiPer flash hider, M4 carbine with 14.5" barrel.

# AU DUAL556-BL DUAL762-BL

The new DUAL-BL series represents the newest generation of Ase Ultra suppressors. The flow-through design is optimal for semi and fully automatic rifles. DUAL provides superior flash suppression and only causes 0-15% increase in the bolt carrier velocity compared to the 25-50% increase of traditional suppressors. Stainless steel construction and Borelock mounting make DUAL extremely durable and reliable and it passes the SOCOM stress test cycles.

## AU S SERIES SL7i-BL

Compact, stainless steel suppressors designed for use on sniper rifles from .308 Win up to .338 Lapua Mag.

Excellent sound and flash suppression performance.

The suppressor mounts using the two-part BoreLock muzzle brake. The two-part design of the muzzle brake makes the initial installation secure, quick, and simple.

# THREAD MOUNTING SUPPRESSORS

Ase Utra also has thread-mounting suppressors available, for those seeking a more lightweight, compact, and cost-effective suppressor model.

Models suitable for military and law enforcement use in .223 up to .338 LM calibers include, for example, the S Series SL5i and SL7i.

For the .50 BMG caliber, the DUAL-Fifty model is available.

The various suppressor models of Ase Utra can be equipped with heat covers. The covers are manufactured from very durable 1000D CORDURA® and Nomex® fabrics. The covers effectively reduce and delay the effect of the mirage from the suppressor. They also assist in removing a hot suppressor from the barrel.

# TYPICAL SOUND PRESSURE LEVELS

The sound pressure levels given on this page are tested on measurement equipment especially intended for measuring gunshot impulse noise.

The shots have been fired in open terrain, over 10 metres away from any reflective surfaces. Please note that sound pressure levels are affected by many factors, such as the environment, weather conditions, caliber, barrel length, and cartridge.

The B&K 2209 sound pressure level meter used by our company is designed for reliable measurement of impulse noise.

## WHY CHOOSE AN ASE UTRA SUPPRESSOR?

- Reduce the risk of temporary or permanent hearing loss.
- Significantly reduce the visible muzzle flash and dust signature.
- Allow better communication between team or squad members.
- Reduce recoil, enabling faster follow up shots.
- Reduce the environmental noise, allowing training facilities or shooting ranges to comply better with noise limits.
- A correctly manufactured and mounted suppressor will not negatively affect accuracy and a more common result is improved accuracy.

Ase Utra Oy is one of the world's largest manufacturers of sound suppressors. We have been manufacturing sound suppressors for hunting, sports and professional use since 1994.

Ase Utra sound suppressors are extremely durable and reliable. Our suppressors are used widely by hunters as well as law enforcement and the military in various countries and in challenging conditions. Our product's popularity is based on its high quality due to uncompromising and ongoing product development work.

## TWO-YEAR WARRANTY

Ase Utra sound suppressors have a two-year warranty that covers any manufacturing faults. Ase Utra suppressors are delivered complete with instructions on maintenance and practical tips on using suppressors.
